

Service description

Product: VM420	Service description No.: 4120-S010	Ver: 1
-------------------	--	-----------

Symptom

Not enough power to move splitting knives upwards downward

Cause

1. Wood chips or dust have jammed the knife
2. The safety valves for knife movement or the control valve for the conveyor belt are incorrectly adjusted
3. The safety valve for the cover above splitting ram is incorrectly adjusted or does not function properly.

Løsning

1. Clean the casing area for the knife
2. Watch [4120-S001](#)
3. Watch [4120-S015](#)
